

BIR London Speaker

An established expert in the world of recovered fibre developments has agreed to address the Paper Round-Table to be held on Thursday October 28 at BIR's London convention. Mr Esko Uutela, Principal of EU Consulting in Germany, will adopt as his theme "The Outlook for Global Recovered Fibre Markets".

EU Consulting is behind the recently-published report entitled "Globalising Recovered Fibre Markets". One of its main contentions is that large-scale investment in new recovered fibre-based papermaking capacity, particularly in China and Europe, will underpin a strong increase in world recovered paper demand over the next few years.
